

SPROUTS STEM

*You are invited to our
STEM Sprouts event!*

A hands-on STEM afternoon just
for children entering Prep in 2019.

Thursday, 19th July - 4:30 to 6:30PM
St John's Primary Campus
Alpine Place

RSVP by July 12th
Email Registrar Janette Collins
at jcollins@sjac.qld.edu.au

Young children are highly curious and love learning. It is never too early to introduce them to Science, Technology, Engineering and Mathematics (STEM) concepts. At St John's we see STEM as a philosophy of understanding that STEM integrates knowledge across the subject areas and encourages children to ask questions and think in a more connected way.

Children thrive when they are given plenty of opportunities to explore and closely investigate. Our STEM Institute allows this to occur from Kindergarten to Yr 12. STEM-related skill development and thinking in the early years provides children with strong foundations for future learning.

COME AND EXPERIENCE

Technology demonstrations including drones,
spheros and robots | Q & A with teachers
Hands-on experiments | Learning with Bee-bots
Afternoon tea and much more!

The afternoon will include a series of hands-on Science experiments, Constructions and Technological Engineers, just right for Kindy children entering Prep in 2019.
